FPI
FINANCE PROCESS
INTELLIGENCE PLATFORM

Which process eats the month, and where exactly does it break?

Assess and transform your finance processes, step by step.

In hours, not months, see where each finance process you choose stands against one written standard, and ask Arpero for what to fix first.

You already know roughly where the problem sits: which process eats the month, which handover breaks, which team is quietly carrying the load. **What is missing is proof: an objective picture of the process end to end, on one written standard, and a clear view of what to fix first.**

> *You are not looking for someone to tell you. You are looking for confirmation you can act on.*

HOW YOU USE IT

You run the assessment yourself. The platform scores it against one written standard of process maturity, and sets out what your answers show. Arpero is there when you want to go further.

What you take away: where each process stands, and what to fix first, on evidence you can put to your leadership.

WHAT IT COVERS

Fourteen finance areas to choose from: Record to Report, Transact to Record, Procure to Pay, Source to Procure, Quote to Cash, Plan to Perform, Project to Result, Acquire to Retire, Treasury, Tax Management, Data to Insight, Govern Risk and Control, Hire to Retire and Supply to Consume. Guided assessment down to individual activities. One written standard behind every score.

See your maturity grid and spider chart at a glance, then ask Arpero for the full picture of an area: the activity breakdown, effort and cost, the insights and the recommendations, in a PDF Arpero sends you.

HOW IT WORKS

1. Run the guided assessment
2. See your maturity grid and spider chart at a glance
3. Ask Arpero for the full picture of an area
4. Talk to us when you want to go further

01 Activity-level maturity
Scored process by process, not just at a headline level.

02 Structure and automation
With pain points mapped across the process.

03 People, hours and cost
Attached to where the effort actually sits.

04 Insight
Patterns, and what has to come first, set out from your own answers, not left for you to piece together.

05 Recommendation
A prioritised view of what to fix first, and what the effort costs today, from your own figures.

Pick your process.

A full end-to-end diagnostic is a serious undertaking, and often the right one. But most decisions do not wait for a programme business case. Start with the process you already suspect, and get a maturity picture and a prioritised view of where improvement pays first.

Arpero
arperocompany.com

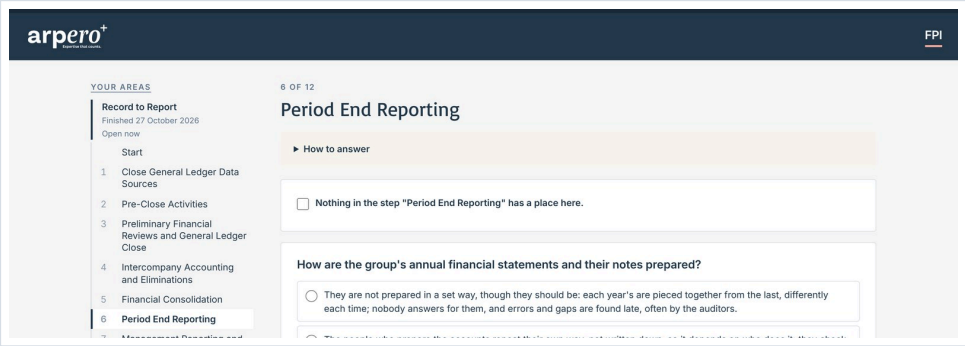

The platform, step by step.

Screens from the platform, with a sample Record to Report assessment, numbered as in ‘How it works’ on the front.

1

Run the guided assessment

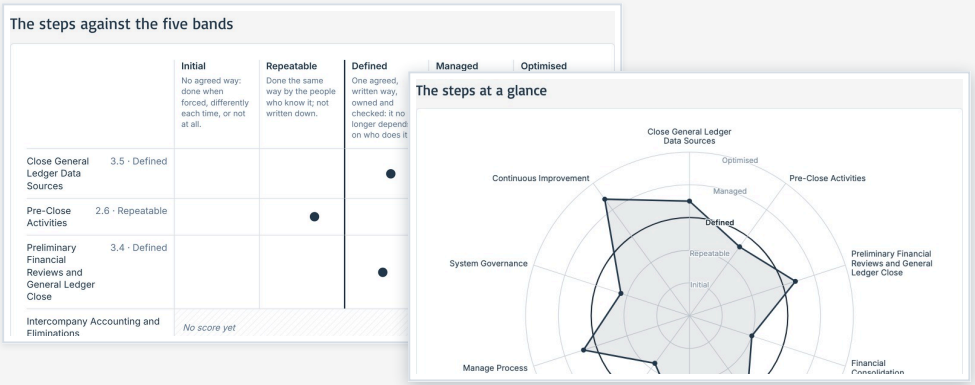

Choose an area and answer its questions, one step at a time: here Record to Report.

2

See your maturity grid and spider chart at a glance

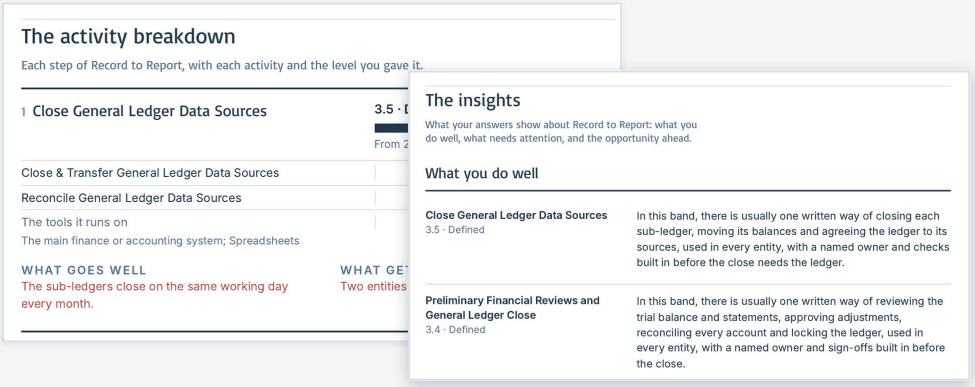

Every step scored from Initial to Optimised, each set against the standard’s Defined level.

3

Ask Arpero for the full picture of an area

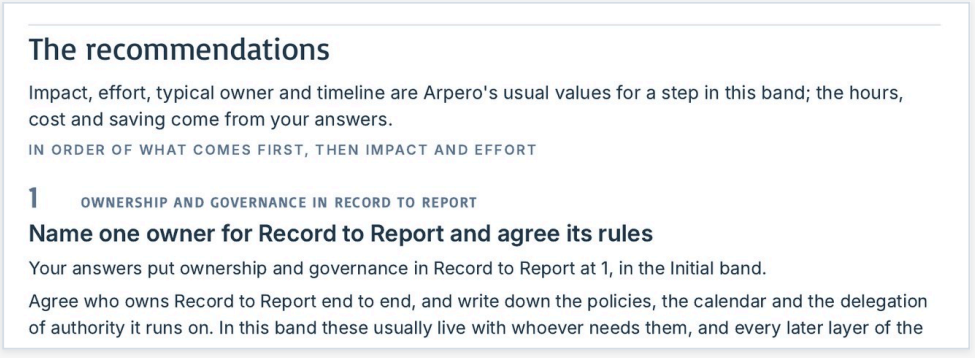

Every activity scored, with what works, what needs attention and the opportunity ahead.

4

Talk to us when you want to go further

Recommendations ranked by what must come first, then by impact and effort, each with a typical owner and an indicative timeline.

To talk your result through, email Arpero. | Arpero arperocompany.com · info@arpero.co.uk
